ABOUT ME

Driven B.Tech student passionate about AI and software development. Equipped with skills in Python, JavaScript, C, C++, HTML and CSS. Ready to learn, work hard, and contribute to real projects while gaining hands-on experience.

EDUCATION

Charusat University | 2024-2028

B.tech-Information Technology

- Currently in 4th Semester
- Focused on programming, databases, and emerging technologies
- Actively improving skills in AI and backend systems
- CGPA: 6.48

Krishna Science School | 2022-2024

Higher Secondary Education (12th Grade)

- Stream: Science (PCM)
- Board: GSEB
- Percentage: 87%

PROJECT

1.Slotify – Smart Parking Management System

Developed a Smart Parking Management System to efficiently manage and allocate parking slots. The system allows users to check slot availability, book parking spaces, and reduce manual effort. Designed to improve parking efficiency using web technologies.

2.Smart AI Gallery – Photo Recommendation System

Developed an AI-based photo gallery system that recommends images based on tags and user preferences. The system organizes and suggests photos intelligently, similar to modern gallery applications.

ACHIVEMENTS

- Unstop : Mind Sprint – 48-Hour International Hackathon
- Hackathon : Solution Challenge 2026 – GenAI for Sustainability
- Coursera : Algorithm Design: Mastering Computational Problem Solving
- Workshop : Machine Learning Workshop

SKILLS

- **Technical Skills:** Python , JavaScript , HTML, CSS, , Node.js
- **Tools & Libraries:** NumPy, Pandas (Basic), GitHub, VS Code
- **Areas of Interest:** Artificial Intelligence(Basics), Backend Development(Learning)
- **Languages:** English, Hindi, Gujarati
